

To SUTD Student Admissions Department,

I am writing to recommend Manfred Siew, who I had the pleasure of meeting while he was interning with RSAF RAiD (RSAF Agile innovation Digital), for admission to your degree program (Design and Artificial Intelligence, DAI)

I have had the opportunity to work closely with him on several joint projects. During his internship, Manfred has been a tremendous help and asset to my team. On two specific projects, I reached out to his department for technical assistance, and Manfred was assigned to support us. He provided invaluable technical advice and hands-on help, particularly in programming and coding. One notable example was a PowerApp project I was leading. Manfred advised me on how to structure and organize the code effectively. Thanks to his contributions, the project was a success, with stakeholders commending on its ease-of-use and ingenuity. This would not have been possible without Manfred's design thinking perspective and programing precision.

What stood out even more was his willingness to help others. Manfred patiently walked me and my colleagues through the technical steps and code logic, making sure we understood the solutions rather than simply delivering them. He also regularly shared the latest news and developments in the programming domain, showing a genuine enthusiasm for staying current and expanding his skillset. I was especially impressed to learn that his programming abilities are largely self-taught—a testament to his keen, curious, and disciplined mind.

Manfred is also open-minded and humble when receiving feedback. In my opinion, he is an enthusiastic learner dedicated to honing his craft. These qualities make him an ideal student for any subject he sets his mind to pursuing. His technical strengths are evident in the work he produces, and his character—helpful, excellence-driven, and collaborative—has been witnessed by both his own supervisors and my team.

It is my strong recommendation that Manfred be admitted to SUTD. He has the ability, attitude, and drive to thrive in your program and beyond.

Please feel free to contact me if you require further information.

Yours sincerely,

Mr Ian Koh Deng Yuan
