

Dear Sir/Madam,

I am writing to provide a reference for Mr Manfred Siew in support of his application to SUTD's Design and Artificial Intelligence (DAI) programme.

Manfred was attached to the RSAF Agile Innovation Digital (RAiD) Office as an intern, where he supported the team's operational workflows and project coordination activities. During his internship, he took initiatives to reach out to people who had issues to solve and proactively suggest ways and means to solve their issues. Through this exposure, he gained familiarity with how Microsoft 365 can be leveraged on to solve daily pain points.

He demonstrated reliability in executing assigned tasks, was responsive in supporting team processes, and showed a willingness to learn within a fast-paced digital operations setting. Being in a semi restrictive digital environment in MINDEF, he had also learned how to integrate commercial solutions, agentic AI tools and implement practical solutions. His experience in navigating structured workflows and contributing to team coordination had provide him with a useful foundation for further studies in digital and AI-related domains.

I believe the DAI programme would provide him with the opportunity to deepen his technical and analytical capabilities, building from his work experience in the real-world digital operations in RAiD.

Please feel free to contact me should you require any further information.

Yours sincerely,  
ME5 Lim Hock Ming

Project Officer
